STRENGTHS

Interaction & UX designer with 5 years of experience and a full experience-design methodology — from user research and scenario insight to flows, interaction specs and prototypes, validated and iterated with usability testing and data. I turn complex flows into clear, usable interaction, decide with data, and ship designs as production-ready code, closing the design-to-build gap. Proactive, cross-functional, with a strong bar for design quality.

EXPERIENCE

Product Experience Designer — Xinghuo Zhiyuan

Aug 2025 — Present

AI companion product Momoso · iOS / Android / Web

Led the end-to-end experience of AI companion product Momoso; framed problems via user research & competitive analysis, partnering with PM/eng to deliver flows, interaction specs and prototypes.

Redesigned customizable AI-character creation & real-time interaction (Live Action, video calls) into a clear, controllable flow — ~30s creation, task completion +~25%, error rate ~30%.

Designed leveling (EX-XP) & dual-currency systems and a contextual monetization funnel (paywalls, tier-skip), tying experience to growth: D7 retention +36%, D0 ARPPU \$35, membership ROI +5%.

Owned UI from wireframe to hi-fi with a dark-neon design system; consistent UI & interaction across 80+ screens.

Ran usability evaluation & A/B tests (interviews, funnels) to fix drop-offs; lifted paid conversion 3.1% → 6.8%.

Codified interaction standards & design methodology and shared them across the team.

UI Designer — Runjian Co., Ltd

Oct 2022 — Nov 2024

Power-grid digitalization · large-screen data visualization

Led UI/UX & information architecture for command-center large-screen products; independently shipped 12+ power-grid projects with client praise.

Ran scenario-based research & usability walkthroughs, organizing dense real-time data into legible, decision-ready interfaces.

Drove experience-innovation research and produced large-screen concepts & proposals that were adopted.

Defined reusable interaction & component specs (states, alerts, feedback) to unify consistency and speed delivery.

Delivered interaction specs & demo prototypes with product/eng, shipping complex requirements reliably.

UI Designer — Lianyou Zhilian (Dongfeng Nissan subsidiary)

Jun 2021 — Aug 2022

Enterprise back-end / admin system

Owned UI/UX & interaction for an enterprise back-end, restructuring complex tables & multi-step flows across 6+ modules — lower learning curve and error rate.

Delivered interaction specs with product/eng, ensuring cross-platform consistency.

Built & maintained a back-end interaction spec and component library (30+ screens), improving reuse and maintainability.

EDUCATION

China University of Geosciences
(Wuhan)

B.A., Digital Media Art · 2017 — 2021

CORE SKILLS

Interaction Design · User Research · UX
Methodology · Usability Testing & Evaluation ·
Information Architecture · Prototyping & Interaction
Specs · Design Systems / Experience Standards ·
Data-driven Iteration · Cross-functional
Collaboration

TOOLS

Sketch · Figma · Cursor · Claude
Code · Codex · HTML / CSS
