PROFILE

I'm a product experience designer who pairs product thinking with hands-on execution. Using a **vibe-coding workflow**, I turn interaction concepts and product strategy into production-ready websites and hand the working code directly to engineering, closing the design-to-build gap and sharply compressing the product and project cycle. I **work from data**: I frame problems through analysis, validate each decision with metrics and A/B experiments, and iterate until the experience proves out.

EXPERIENCE

Product Experience Designer — Momoso (AI Companion Platform)

Aug 2025 — Present

AI companion & digital-human co-creation app · iOS / Android / Web

Lead the **end-to-end UX** of an AI companion product as the product designer, partnering closely with PM and engineering, where users create customizable AI characters and direct content generation in real time (Live Action, video calls).

Designed the **0-to-1 first-run creation flow** ("create your AI companion" in ~30s), reducing onboarding drop-off and clarifying a complex multi-step setup.

Designed the **intimacy / leveling system (EX-XP)** and **dual-currency economy (Coins)** that tie engagement to monetization, lifting **D7 retention +36%**.

Built the **monetization funnel** (contextual paywalls, top-up packs, tier-skip unlocks at high-intent moments), driving **D0 ARPPU to \$35** and **+3% membership ROI**.

Turned designs into **production-ready web pages via a vibe-coding workflow** and handed the code directly to engineering, cutting the design-to-development handoff.

Defined **real-time interaction patterns** for live generation and video calls; established the dark, neon-accented visual system.

Ran **data-driven iteration and A/B experiments**, framing each design decision as a hypothesis validated with metrics.

UI Designer — Digital Grid (on-site)

Oct 2022 — Nov 2024

Power-grid digitalization · large-screen data visualization

Designed **UI/UX for large-screen, real-time data-visualization dashboards** in monitoring and command-center contexts, balancing dense data with legibility at scale.

UI Designer — Lianyou Zhilian (Dongfeng Nissan subsidiary)

Jun 2021 — Aug 2022

Enterprise back-end / admin system

Designed the UI for an **internal back-end management system**, structuring complex data and workflows into clear, usable interfaces.

EDUCATION

China University of Geosciences (Wuhan)

B.A., Digital Media Art · 2017 — 2021

CORE SKILLS

UX Strategy · Interaction Design · Information Architecture · Design Systems · Growth & Monetization · A/B Testing · Data-driven Iteration · Vibe Coding / AI Prototyping

TOOLS

Sketch · Figma · Cursor · Claude Code · Codex · HTML / CSS
